

Design Monat Graz

Call for exhibitors
May 3 to June 2, 2024

Design Monat Graz

Design Month Graz_ May 3 to June 2, 2024

Design Month Graz 2024 invites design studios, creatives and innovative companies together with cooperation partners from science and research to submit their ideas, approaches, utopias and models in order to present visionary solutions as part of a large exhibition.

The question is „WHAT NOW!“? - what to do?

What do we need now? Our world is in upheaval. Crises and uncertainties dominate. The time for lip service is over. The what and how of previous answers are not enough. We need a different what, a new how. We need new and different answers - solutions, visions and methods that offer a way out. One thing is clear: Not one discipline alone will „save the world“. It needs the creative power of many - it needs idea generators and implementers in many areas. We want to give them a platform in Design Month Graz 2024.

**Submit
now and
help shape
the future.**

**Submit
proposals_**

__Short **description/abstract** - aim and background of the project (max. 1,200 characters)

__**Expressive images** of the project (max. 4 images, image size: max. 2 MB, landscape format, including credits).

__Please **send submissions** by **February 7, 2024** to >> barbara.nussmueller@cis.at

Potential kills Dystopia_

What potential can we use to counter dystopias? How can we use our potential for a good future? We are looking for solutions in different areas: Mobility, food, energy, industry, work, robotics and artificial intelligence, housing & architecture or circular economy & resources, etc. We are looking for answers and scenarios to questions such as:

__What now!?! ad **Mobility** – own or use? Which mobility solutions will really move us forward?

__What now!?! ad **Lab-grown meat & co** – how can scientific successes reach our bellies?

__What now!?! ad **Waste as a raw material**, repairing instead of producing - how do we establish a circular economy?

__What now!?! ad **Industry & automation** – how can industry (industrial production) return to the cities?

__What now!?! ad **Modular, sustainable, flexible building and living** – What kind of architecture and urban development do people need?

__What now!?! ad How can we use **AI as an opportunity**, instead of demonizing it?

And much more...

A team of curators will select the projects that will be prepared and presented as part of the central exhibition of Designmonat Graz.
